(54) Title: IMAGE CAPTURE AND RETRIEVAL APPARATUS

(57) Abstract: An image capture and retrieval apparatus includes a camera unit (18) including a high resolution image sensor (24) for capturing data relating to a visual image, a radio transmitter (17) and radio receiver (40) for triggering the image sensor (24) of the camera unit (18) to capture image data at a predetermined time and/or location. The apparatus further includes a base station (16) for retrieving and processing image data and a camera unit (18) including data storage means for transmitting the image data, the moveable unit being adapted for conveying to the base station image data captured by the image centre (24) at a location remote from the base station (16).
